EDUCATION

Michigan State University Honors College – GPA: 3.96

Aug. 2024 – Dec. 2027

Bachelor of Science in Computer Science, Minors in Data Science and Computational Math

East Lansing, MI

Coursework: Data Structures & Algorithms, Object Oriented Programming, Quantum Computing, Computer Systems

EXPERIENCE

AI Engineering Intern

Dec. 2025 – Present

APS Data Technologies

- Directed an AI coding agent to implement and patch features across an ERP platform, validating outputs through manual testing and branch review to ensure correctness and stability
- Implemented OAuth authentication flows in a Django Python backend, handling token verification and role-based access paths across multiple user roles in a production environment
- Diagnosed and resolved deployment failures including ECR migration and corrupted storage across dev and production environments, restoring platform stability across an integrated cloud pipeline

Software Engineering Intern

May 2025 – Dec. 2025

Alchemy Software LLC

- Wrote over **20** test cases and created a testing library to reduce the effort of new test cases by **90%**, establishing a reusable validation framework for ongoing feature development
- Managed code conflicts and design integration within a **6+** member team using Git, collaborating in weekly meetings to merge new features and streamline development workflows
- Debugged and resolved critical issues within new features, ensuring stability for monthly version launches

Proving in AI: Independent Research

Jan. 2025 – May 2025

Michigan State University

- Investigated AI development foundations across **6** sources and presented original conclusions through a **13+** minute virtual presentation, communicating technical research results to a peer audience

ORGANIZATIONS

Imagine Software Club | *Project Director*

Aug. 2024 – Present

- Built a React frontend for Ollama LLM interaction and a Chrome extension for RESTful API communication with Gemini and Mistral, gaining hands-on experience with agentic AI tools and model integration
- Led weekly check-ins with project leads across **7** concurrent client projects, identifying blockers early to maintain progress, resulting in all **7** projects meeting MVP requirements and reaching deployment
- Developed and delivered educational workshops on developer tools and Git for **10+** members, producing reference documentation and live demos to onboard new contributors

FRC Team 3604 Goon Squad | *Mechanical Lead*

Sep. 2021 – May 2024

- Managed **5** groups of **15+** mechanical team members by communicating design decisions and priorities to accelerate development cycles and respond quickly to technical setbacks
- Designed and manufactured a game piece launch system using best engineering practices, iterating on the subsystem to increase scoring accuracy by **20%** through improved mechanical control

PROJECTS

Easy Text Transfer | *Electron, TypeScript, JavaScript, React Native, Expo, Firebase*

Oct. 2025 – Dec. 2025

- Built a cross-platform text and note sync application across desktop and mobile clients using a polling-based architecture with last-write-wins conflict resolution to handle concurrent edits
- Implemented a shared state sync model where the most recently timestamped write takes precedence, eliminating conflict ambiguity without requiring a distributed consensus protocol

TECHNICAL SKILLS

Languages & Tools: Python, Bash, Java, C, C++, TypeScript, JavaScript, HTML, CSS, React, React Native, Next.js, Django, NumPy, Pandas, Matplotlib, MongoDB, Firebase, R

Developer Tools: Git, GitHub, Docker, AWS, Ollama, Gemini, Claude, VSCode, Ubuntu

Soft Skills: Critical thinking, communication, time management, problem solving, troubleshooting, proactive learning
